PROFESSIONAL SUMMARY

Computer Science student and self-directed cybersecurity learner with hands-on experience in IT support, digital infrastructure, and customer-facing technical roles. Focused on junior SOC work, including alert triage, log analysis, incident handling, threat detection, and basic vulnerability awareness. Currently building practical defensive security skills through TryHackMe, daily OWASP Top 10 practice, and structured labs in a personal home environment. Holds Google Cybersecurity and IT Support certifications. Seeking a junior SOC analyst or cybersecurity internship role where I can apply and grow these skills in a professional environment.

SECURITY TRAINING

SOC Foundations & Defensive Security

TryHackMe - 15+ Labs Completed

- Progressing through defensive security and SOC-relevant learning paths with publicly visible profile.
- Daily practice reviewing logs, identifying suspicious activity, and documenting findings from personal home lab exercises.
- Practical experience in alert triage, vulnerability awareness, and security remediation workflows.

Google Cybersecurity Certificate

Google Career Certificates

- Threat detection, incident response, and network security fundamentals.
- Linux fundamentals and Python basics for security automation.
- Practical knowledge of security tools, log analysis, and defensive practices.

IT Support Assistant

Region of Western Greece

- First-level IT support and basic troubleshooting for routine user requests.
- Digital document archiving and cloud file organization for internal teams.
- Maintained infrastructure and security best practices for content systems.

Additional Technical Roles

Sales, Front Desk, Hospitality

- Sales Agent:** High-volume customer communication and technical service inquiries.
- Front Desk:** PMS systems, customer records, and operations coordination.
- Technical Support:** Customer-facing technical guidance and troubleshooting.
